

## **Strategic Network Manager – Job Description**

An outstanding and forward looking independent primary day school based in south west London is seeking to appoint a Head of IT strategy. This is a senior full time role and an exciting opportunity with the following responsibilities.

- Advising the academic staff about developments in using IT to enhance learning
- Advise the school in driving new systems and concepts into the school educational and administrative practices
- Maintenance of the school server farm.
- Management and development of the school network and communication systems.
- Management of the IT support team to deliver a first class service to all end users.
- Maintenance of the school infrastructure to ensure a high level of availability to all
- Development of all staff in the use of the school IT systems.

The successful candidate is likely to have a technical management background and will have:

- A demonstrable understanding and interest in the present and future use of IT in education and social networking.
- Significant experience in the management and implementation of MS Windows network infrastructures.
- A sound knowledge of server maintenance, switched networks and network security
- A proven track record in reflecting the ability to operate in a team environment
- A proven ability to manage and develop others.
- A good working knowledge of all the issues associated with the integration of Mac computers and servers into a network would be an advantage.

Remuneration is negotiable and commensurate with the importance and seniority of this post.

Please apply by completing an application form and send this, together with your CV and a handwritten letter explaining why you think you would be suitable for this post by 5<sup>th</sup> July to :
